

# User Manual: MoneyFlow AI

## 1. Introduction

MoneyFlow AI is a comprehensive personal finance management application designed to help users track income, expenses, and overall financial health using smart insights and intuitive visualizations. The app provides a simple and user-friendly interface for effective financial planning and decision-making.

## 2. App Installation & Permissions

### 2.1 Installation Steps

- Locate the **MoneyFlow.apk** file on your device.
- Enable “**Install from Unknown Sources**” in your Android settings (if prompted).
- Tap on the APK file to start installation.
- Wait for the installation to complete.
- Open the app from your app drawer.

### 2.2 Required Permissions

- **Internet Access:** Required for syncing data with Firebase cloud services.
- **Network State Access:** Used to detect internet connectivity for real-time updates.

## 3. Login & Signup Process

### 3.1 New User Registration (Signup)

- Open the app and view onboarding screens.
- Enter your **Full Name, Email Address, and Password** (minimum 6 characters).
- Complete profile setup after registration.
- Set a **4-digit PIN** for additional security.

### 3.2 Returning User (Login)

- Enter your registered Email and Password.
- If PIN security is enabled, enter your 4-digit PIN.
- Tap Login to access the Dashboard.
- Use “Forgot Password” option to reset credentials if needed.

## 4. App Features Explanation

### 4.1 Financial Dashboard

- **Balance Summary:** Displays total balance, income, and expenses.

- **Financial Health Score:** Shows financial status (Poor, Average, Good, Excellent).
- **Smart Insights:** AI-based suggestions for financial improvement.
- **Expense Chart:** Visual representation of spending categories.
- **Recent Transactions:** Quick view of latest financial activities.

## 4.2 Transaction Management

- **Add Transaction:** Tap (+) to add income or expense.
- **View Details:** Tap any transaction for full details.
- **Edit/Delete:** Modify or remove transactions with undo option available.

## 4.3 Budgeting System

- Set monthly budget limits.
- Track spending progress using color indicators:
- **Green:** Safe usage (below 60%)
- **Yellow:** Warning (60%–85%)
- **Red:** Over budget (above 85%)
- View category-wise spending breakdown.

## 4.4 Profile & Security

- Update personal profile details.
- View profile history records.
- Change currency settings.
- Enable or disable PIN security.

## 5. Navigation Guide

- **Splash Screen:** Automatically checks login status.
- **Dashboard:** Main financial overview.
- **Transactions:** View and manage all records.
- **Budget:** Set and track budgets.
- **Profile:** Manage account and settings.

Navigation is handled via bottom tabs and back buttons.

## 6. Error Handling & Guidance

- **Input Validation:** Invalid inputs are highlighted.
- **Sync Issues:** Use swipe-to-refresh to reload data.
- **Login Errors:** Error messages appear for incorrect credentials or missing accounts.

## 7. Developer Notes (Technical Stack)

- **Language:** Java (Android SDK)
- **Backend:** Firebase Authentication, Firestore, Storage
- **Local Database:** Room Database
- **UI Components:** Material Design 3, Jetpack Navigation, ViewBinding
- **Libraries:** MPAndroidChart (graphs), Lottie (animations), Glide (images)

## Final Note

This application is designed for personal finance tracking with secure authentication, real-time syncing, and smart financial insights.
